

ARPITA SAHOO

AI ENGINEER & FULL STACK DEVELOPER

Bhubaneswar, Odisha, India | arpitasahoo998@gmail.com | [linkedin.com/in/arpitasahoo3763](https://www.linkedin.com/in/arpitasahoo3763)

PROFESSIONAL SUMMARY

Results-driven Software Engineer with 5+ years of experience in Python and PHP development, full stack development, AI automation systems, backend engineering, and REST API development. Experienced in building AI chatbots, voice bots, OCR-based document processing systems, and scalable applications using Python, Flask, FastAPI, and MySQL/PostgreSQL. Skilled in Generative AI, LLM integrations, workflow automation, and performing security audits for chatbot and voicebot applications to improve security and reliability.

TECHNICAL SKILLS

LLM / Generative AI: Large Language Models (LLMs), Generative AI, Prompt Engineering, OpenAI API Integrations, AI Chatbots, Voice Bots, NLP

AI & Automation: OCR Document Processing, Conversational AI, Workflow Automation, Intelligent Query Processing

Frontend Development: HTML, CSS, JavaScript, Bootstrap, jQuery, AJAX, Responsive UI Development

Backend Development: Python, PHP, Flask, FastAPI, CodeIgniter, REST APIs, API Integrations

Security & Testing: Application Security Audits, API Testing, Vulnerability Assessment

Tools & Platforms: Git, GitHub, Linux, Postman, Nginx

Additional Technologies: WhatsApp API, PDF Processing

KEY

PROJECTS

• & TECHNICAL CONTRIBUTIONS

• AI Conversational Chatbot & Voice Bot

• RajSampark 2.0 – Department of IT&C, Government of Rajasthan

Tech Stack: Python, PHP, HTML, CSS, JavaScript, jQuery, Flask/FastAPI, NLP, REST APIs, MySQL, AI Voice

• Integration

• Developed AI-based and button-based chatbots and voice bots for Rajasthan 181 citizen

• services.

• Designed and developed dashboards to monitor bot performance and user

• 2

• interactions.

• Created a unified portal using PHP and frontend technologies to view bot and

• customer conversations stored in the database.

• Developed interactive voice survey interfaces and integrated APIs to fetch and

- display data.
- Improved response handling using NLP and AI-based query processing.
- Performed security audits for chatbot and voicebot applications to improve security
- and reliability.
- AI Features
- Conversational AI
- NLP-based response processing
- Voice automation
- Intelligent query routing
- Button-based conversational flows
- OCR-Based Intelligent ERP System
- Inventory Management Portal

Tech Stack: Python, Flask, OCR, PostgreSQL

- Developed an AI-assisted ERP platform for inventory, billing, and payment
- management.
- Implemented OCR-based intelligent invoice and bill data extraction workflows.
- Automated stock tracking and invoice generation processes.
- Built backend reporting and PDF generation systems.
- AI Features
- OCR document extraction
- Automated invoice processing
- AI-assisted workflow automation
- Intelligent text recognition
- Healthcare Lab Management System
- Quick Health Services

Tech Stack: PHP, MySQL, WhatsApp API

- Developed a healthcare lab management platform for diagnostics and patient records.
- Integrated lab devices for automated report collection workflows.
- Implemented automated WhatsApp report delivery after payment verification.
- Improved operational efficiency using workflow automation systems.
- AI Features
- Automated workflow processing

• 3

- Intelligent report management
- System integration automation
- Automated WhatsApp Campaign Management Platform

Tech Stack: Python, Flask, PostgreSQL, WhatsApp API

- Developed a bulk WhatsApp campaign management system with automated
- workflows.
- Built role-based approval systems and delivery tracking modules.
- Implemented campaign analytics and CSV reporting features.

- Designed scalable backend automation systems for communication workflows.
- AI Features
 - Automated communication workflows
 - Campaign analytics
 - Intelligent automation systems
- PROFESSIONAL EXPERIENCE
 - Full Stack Developer | Ikontel Solutions Pvt Ltd | Bhubaneswar | May 2021 – Present
 - Developed web applications, automation systems, and backend solutions using Python and PHP.
 - Designed and developed frontend and backend features, dashboards, and database-driven applications.
 - Built and integrated REST APIs with third-party systems.
 - Developed AI-based and button-based chatbots and voicebots for automated user interactions.
 - Built OCR-based document extraction systems using Python.
 - Worked on LLM concepts, Prompt Engineering, Generative AI integrations, and AI-powered automation workflows.
 - Improved query handling using natural language processing and automated responses.
 - Worked on deployment, debugging, production support, and security audits to improve application security and reliability.

EDUCATION

B.Sc. (Bioinformatics): Utkal University | 2017 – 2020
