

ARPITA SAHOO

Full Stack Developer | AI & Automation Specialist (Python & PHP)

Bhubaneswar, Odisha | +91 9348643763 | arpitasahoo998@gmail.com | linkedin.com/in/arpitasahoo3763

PROFESSIONAL SUMMARY

Full Stack Developer with 5+ years of experience building production systems in Python and PHP, with a specialization in AI-powered automation — conversational chatbots, voice bots, OCR-based document processing, and workflow automation. Delivered a statewide AI/voice bot deployment for the Government of Rajasthan (181 citizen services), OCR-driven ERP systems, and automated communication platforms. Skilled in Flask, FastAPI, REST API design, LLM/Generative AI integration, and security auditing for production systems.

TECHNICAL SKILLS

AI & Automation: LLM Integrations (OpenAI API), Generative AI, Prompt Engineering, Conversational AI, NLP-based Query Processing, OCR Document Processing, Workflow Automation

Backend Development: Python, PHP, Flask, FastAPI, CodeIgniter, REST API Design & Integration

Frontend Development: HTML, CSS, JavaScript, React.js, Bootstrap, jQuery, AJAX

Databases: MySQL, PostgreSQL

Security & Testing: Application Security Audits, API Testing, Vulnerability Assessment

Tools & Platforms: Git, GitHub, Linux, Postman, Nginx

Additional: WhatsApp API Integration, PDF/Document Processing

KEY PROJECTS

AI Conversational Chatbot & Voice Bot — RajSampark 2.0, Dept. of IT&C, Government of Rajasthan

Tech: Python, PHP, Flask/FastAPI, NLP, REST APIs, MySQL, React.js, AI Voice Integration

- Developed AI-based and button-based chatbots and voice bots for a statewide deployment covering 181 citizen services
- Improved response accuracy and speed by rebuilding query routing with NLP-based intelligent processing
- Designed and built performance-monitoring dashboards giving stakeholders real-time visibility into bot usage and accuracy
- Built a unified portal (React.js + Python) consolidating bot and customer conversation history into a single searchable interface, replacing fragmented manual logs
- Developed interactive voice survey interfaces integrated with backend APIs for real-time data retrieval
- Conducted security audits across chatbot and voicebot systems as part of production hardening before statewide rollout

OCR-Based Intelligent ERP System — Inventory Management Portal

Tech: Python, Flask, OCR, PostgreSQL

- Built an AI-assisted ERP platform automating inventory, billing, and payment management
- Implemented OCR-based invoice and bill data extraction, reducing manual data entry effort
- Automated stock tracking and invoice generation workflows
- Built backend reporting and PDF generation systems

Healthcare Lab Management System — Quick Health Services

Tech: PHP, MySQL, WhatsApp API

- Developed a lab management platform for diagnostics and patient record handling
- Integrated lab devices for automated report collection workflows
- Automated WhatsApp report delivery following payment verification, reducing report turnaround time
- Improved operational efficiency through workflow automation

Automated WhatsApp Campaign Management Platform

Tech: Python, Flask, PostgreSQL, WhatsApp API

- Built a bulk WhatsApp campaign management system with automated delivery workflows
- Implemented role-based approval systems and delivery tracking modules
- Added campaign analytics and CSV reporting features
- Designed scalable backend automation architecture for communication workflows

SkyPulse: Real-Time Weather Application

Tech: React JS, Vite, Open-Meteo API, CSS

- Built a modern, interactive weather application featuring dynamic glassmorphism theming, live 5-day forecasts, and intelligent location geocoding
- Optimized performance using React JS & Vite
- Integrated Open-Meteo API with debounced search functionality
- Implemented dynamic CSS theming and micro-animations for enhanced user experience

PROFESSIONAL EXPERIENCE

Full Stack Developer | Ikontel Solutions Pvt Ltd | Bhubaneswar | May 2021 – Present

- Developed web applications, automation systems, and backend solutions using Python and PHP
- Designed and built frontend and backend features, dashboards, and database-driven applications
- Built and integrated REST APIs with third-party systems
- Developed AI-based and button-based chatbots and voicebots for automated user interactions
- Built OCR-based document extraction systems using Python
- Applied LLM concepts, prompt engineering, and Generative AI integrations to automation workflows
- Improved query handling through NLP and automated response systems
- Handled deployment, debugging, production support, and security audits to strengthen application security and reliability

EDUCATION

B.Sc. in Bioinformatics — Utkal University, 2017–2020

CERTIFICATIONS

- Full Stack Development — JSpiders, Bengaluru
- Python Programming — LIT, Bhubaneswar
